

Community Safety Audit

Crimes Recorded in Newry and Mourne District Council Area 2006/07

**NIO Statistics and Research Branch
January 2008**

Explanatory Notes

The following tables represent a breakdown of recorded crimes, at ward level, which occurred in Newry and Mourne District Council area in 2006/07 and for which a valid postcod has been included in the dataset supplied by PSNI's Central Statistics Unit. Care should be taken when interpreting the recorded crime data presented in the report, for not all crimes which occurred in a specific District Council / Ward may be included in the total, as a result of missing or incomplete postcodes (0.5% across Northern Ireland during 2006/07). Some crimes may have been reported to a different District Command Unit (DCU).

To enable comparisons to be made, crime rates per 1,000 population have been calculated at Northern Ireland, district (DC) and ward levels using Census 2001 household population figures.

Also presented, at ward level, is the Northern Ireland Multiple Deprivation Measure (NIMDM) derived from the 2005 Review of Measures of Deprivation, commonly known as the Noble Measures. This provides a relative ranking of the 582 wards across Northern Ireland allowing the most deprived areas to be identified. The ward ranked '1' is most deprived and the ward ranked '582' is least deprived. The NIMDM 2005 brings together many indicators covering specific aspects of deprivation – one of which, the Crime and Disorder domain is also included (Table 2.1). Additional information on the NIMDM 2005 and characteristics of wards is available on the Northern Ireland Neighbourhood Information Service (NINIS) website www.ninis.nisra.gov.uk

It should be noted that a change to counting rules made in April 2003 resulted in a substantial increase in the number of assault occasioning actual bodily harm (AOABH) offences recorded and a similar decrease in common assault offences. Prior to the change, if a victim had received no or minor injuries, in an assault reported to the police, this would have been recorded as common assault. Now, only those offences of assault, where no injury has been experienced by the victim, are being recorded as common assault. Those assaults where the victim has received some form of injury are being recorded as at least AOABH, with the actual classification being subject to the extent of injury.

e
